Data Analysis & Report Preparation**

## ACKNOWLEDGMENTS

### **Coding of Offender History Information**

- Classification Specialists (Bureau of Research)  
Jim Bates  
Reeda Boyd  
Vicky Muncy  
Nylita Sutton  
Venita White

### **Preparing/gathering PSIs/OBIs - Adult Parole Authority - Field Services Section**

- Special thanks to Sharon Haines, Superintendent for authorizing APA work on the study.
- For coordinating investigation preparation/submission:

#### Parole Program Specialists (Case Analysts)

Laura Kirby, Cincinnati Region  
Cliff Labyk, Cleveland Region  
Tracey Rammelsberg Conklin, Columbus Region  
Margie Reindel, Lima Region  
Joyce Sedlak, Chillicothe Region  
Justin Willis, Cleveland Region  
John Renner, TWL Akron Region  
Lazarus Todd, TWL Mansfield Region

Sue Damron, Deputy Superintendent  
Kathy Butler, Deputy Superintendent

- For preparing/gathering PSIs/OBIs:

All Unit Supervisors and Parole and Probation Officers who completed offender background and pre-sentence investigations.

### **Assistance at DRC Reception Centers**

- All Classification staff who collected demographic and social characteristics information on short-term offenders.

## EXECUTIVE SUMMARY

### Social and Demographic Characteristics

- Of the 3,197 offenders included in the study, 87% were male and 13% were female.
- The racial composition of the intake sample was: 51.9% African American, 47.9% Caucasian, and 0.2% Other.
- The five counties with the greatest numbers of offenders committed to Ohio prisons during the intake study period were: Cuyahoga (N=800; 25%), Franklin (N=341; 10.7%), Hamilton (N=302; 9.5%), Summit (N=170; 5.3%) and Montgomery (N=167; 5.2%).
- The average age of offenders in the intake study was 31.2 years and the median age was 30. Males had an average age of 30.8 and a median age of 29. Both the average and median age for females was 34.
- At the time of arrest (for the current most serious commitment offense), roughly two-thirds (66.1%) of the offenders were single (never married), 11.8% were married and 21.3% were separated or divorced.
- At the time of arrest, 47.9% of the offenders were unemployed; 36.1% were employed full-time.
- At the time of arrest, the educational attainment of the males was as follows: 7.6% had a grade school education or less, 40.7% had some high school, 39.1% were high school graduates or the equivalent, but had not attended college, and 12.7% had some college training. The respective education rates for females were 7.6%, 34.8%, 35.3% and 22.3%.
- From self-admission and social and criminal history records on the inmates in the sample, it was found that when compared to males, a much higher percentage of females had experienced:
  - ❖ Physical abuse as a child or adolescent (female = 24.7%; male = 9.9%);
  - ❖ Sexual abuse as a child or adolescent (female = 28.2%; male = 5.1%); and
  - ❖ Mental health problems (female = 42.6%; male = 21.9).
- Similar levels of recent drug abuse (female = 80.4%; male = 80.3%) were found for both male and female offenders.\* Males were slightly more likely than females to have had a history of drug abuse (female = 81.6%; male = 86.2%), recent alcohol abuse (female = 45.9%; male = 59.8%) and a history of alcohol abuse (female = 58.3%; male = 69.7%). Females, however, were slightly more likely to have completed a substance abuse treatment program (female = 27.4%; male = 22.2%).

### Current Most Serious Commitment Offense

- About a third of the males (32%) were incarcerated for committing a crime against persons (including sex offenses) as their most serious offense, with almost another third (30.2%) for committing a drug

---

\* Recent drug or alcohol abuse is abuse that occurred within the 6-month period prior to arrest for the current commitment offense. A history of drug abuse is abuse that occurred more than 6 months prior to that arrest date.

offense. Over a third (37.2%) of the females were incarcerated for committing a drug offense as their most serious offense, and about one-fifth each for committing a crime against persons [including sex offenses] (21.2%) or a miscellaneous property offense (19.3%).

- The five offenses (most serious commitment offense) for which the male and female offenders in the sample were most often committed were:

<u>Males</u>		<u>Females</u>	
Drug Abuse/Possession	18.7%	Drug abuse/possession	26.3%
Drug Trafficking	8.2%	Theft	13.8%
Receiving Stolen Property	6.6%	Forgery	9.9%
Burglary	6.3%	Drug Trafficking	7.3%
Theft	5.6%	Robbery	5.1%

- Most offenders (96.6 %) pled guilty to charges (female = 98.1%; male = 96.3%).
- Three-fifths (59.7%) of the males and three-fourths (75.8%) of the females in the study were incarcerated on a determinate sentence of between 6-12 months for the most serious conviction offense.
- Roughly two-fifths of the males (41.7%) and females (41.4%) in the study were incarcerated on a technical or new crime violation of felony probation or a new crime violation of parole.
- Weapons were involved, in some manner, in the conviction offense in 25.4% of the cases.\*
- Close to half (45.6%) of the offenders were under the influence of drugs or alcohol at the time of at least one of the instant conviction offenses (female = 48.4%; male = 45.2%).

### Criminal History

- Men were more likely than women to have had at least one prior prison incarceration (male = 46.9%; female = 36%), and at least one prior jail incarceration (male = 54.6%; female = 48.7%);
- Women were a bit more likely, however, to have had at least one prior adult supervision term (female = 77.2%; male = 74.1%) and at least one prior revocation of adult supervision (female = 53.9%; male = 50.4%).
- Almost three-fourths (72.1%) of the offenders had at least one prior adult conviction for a non-violent misdemeanor (female = 71.3%; male = 72.2%). Just over one-fourth (27%) of the offenders had at least one prior adult conviction for a violent misdemeanor (female = 13.8%; male = 28.9%).
- Six in ten offenders (60.2%) had at least one prior adult felony conviction (female = 53.6%; male = 61.2%).

---

\* “involved” includes situations where the offender feigned having a weapon or where a weapon was present but not used in the commitment offense, as well as situations in which a weapon was used to injure or kill.

- Almost one-fourth (22.8%) of the offenders had at least one prior adult conviction for a violent (non-sex) felony (female = 13.3%; male = 24.3%).
- About one-fifth (20.9%) of the offenders had at least one prior adult felony conviction for drug use or possession (female = 21.3%; male = 20.9%).
- Roughly one in eight offenders (13.0%) had at least one prior adult felony conviction for drug sale or trafficking (female = 9.2%; male = 13.6%).

### Assessment of Senate Bill 2 Impact

- Only 1.8% of the inmates admitted during the Intake 2001 study period were under the Pre-Senate Bill 2 law (98.2% were Post-Senate Bill 2).
- The percent of inmates admitted who were truly non-violent (TNV) continued the decline witnessed since the enactment of Senate Bill 2. Since the 1996 Intake Study (which included only Pre-Senate Bill 2 inmates), where the percent of truly non-violent inmates was 44.4%, this figure declined to roughly 40 percent in the 1997 and 1998 Intake Studies, to 38.6% in the 2000 Intake Study and again in the 2001 Intake Study to 35.8%. A TNV offender is one who has **no** violent current conviction or indictment offense, **no** prior felony conviction for a violent or sex offense, **no** gun time, and **no** weapon involvement in the current offense.
- The percent of TNV offenders who were supervision (parole or probation) violators declined for the second straight year after having risen in each of the two years before that. This figure rose from about 36% in the 1996 Intake Study to 50% in the 1997 study and 54% in the 1998 study. The figure then declined to roughly 49% in the 2000 study and to 47% in the 2001 study.
- The percent of inmates who were probation violators followed a similar pattern as the percent of TNV offenders who were supervision violators, having risen from approximately 30% in the 1996 Intake Study to 35% in the 1997 study and 39% in the 1998 study, then declining to roughly 37% in the 2000 study and 34% in the 2001 study.
- The percent of inmates who committed a new crime while on parole or post release control rose yet again in the 2001 Intake Study to almost 8%. This figure has risen in each intake study since the inception of Senate Bill 2. The rate in the 2001 Intake Study is more than four times what it was in the 1996 study.
- Taken together, these figures suggest that the intended impact of Senate Bill 2 in terms of resulting in an intake population that contains a higher proportion of violent/more serious offenders and a smaller proportion of truly non-violent offenders may be leveling off. The percent of the intake population that is truly non-violent has declined each year since 1997, while the percent of inmates committing a new crime while on parole or post release control has increased each year. However, the percentages of both the truly non-violent offenders who were supervision violators and of probation violators, having risen through 1998, declined in each of the past two years.

## INTRODUCTION

The purpose of this report is to present a basic profile of newly committed inmates entering the Ohio Department of Rehabilitation and Correction (DRC) prison system during 2001. The profile of Intake 2001 inmates includes the following information: (1) demographic and social characteristics of the inmates; (2) characteristics of the current commitment offense, and; (3) the inmate's prior criminal history. These tables may be used to compare the characteristics of inmates entering the prison system across the years for which similar data have been collected (1985, 1992, 1996, 1997, 1998 and 2000).

### Methodology

In general, data for intake studies are collected on all inmates who enter the DRC prison system during a two-month period. Information is obtained from three sources:

- (1) Interviews with inmates at reception centers;
- (2) Written investigations, and;
- (3) Microfiche from the records department to supplement partial or incomplete investigation reports.

The interviews with the inmates, conducted by DRC classification specialists, take place at DRC's three reception centers housed at Lorain Correctional Institution, Ohio Reformatory for Women, and the Correctional Reception Center. The emphasis is on social history information not consistently available in offender files.

The DRC would like to prepare a full investigation (either a PSI – Pre-Sentence Investigation – for the sentencing judge or an OBI – Offender Background Investigation – a similar document prepared with a focus on DRC information needs) for each new inmate. Unfortunately, resource and administrative demands prevent that on a routine basis. Inmates who will be serving sentences less than 90 days frequently enter the system without such a report. Also, the investigations for offenders expected to spend longer than three but less than 12 months are reduced in scope. During the two-month study period, however, APA staff are requested to write investigation reports for all offenders entering Ohio's prisons in order to obtain an accurate representation of all inmates entering the prisons during the intake study period (and, it is hoped, the entire year).

The investigation reports primarily consist of pre-sentence investigation and offender background information reports produced by Adult Parole Authority (APA) staff. Most reports are written by APA officers based in the jurisdiction where the offender committed his/her offense(s). The rest are prepared by the probation departments in the committing counties. The report is supplemented, if appropriate, with information on types and amounts of drugs and the value of the theft crimes. Central Office classification specialists then read through each investigation report, collect and code the information not obtained from the intake interview for the Intake Study Report.

With such a large data collection effort, it is inevitable that some of the necessary information on offenders will be missing from the investigation reports. When information is missing, classification specialists must obtain microfiche records on inmates from the records

bureau at Central Office, read through the available information and attempt to retrieve the missing information.

Data were collected on all inmates who entered the DRC prison system between May 21, 2001 and July 20, 2001. The resulting data set contains information on a sample of 3,197 newly committed inmates received by DRC during this two-month period.

### Caveats Regarding the Data

There are several limitations to the data of which the reader should be aware when assessing this information. First, the reader should bear in mind that the characteristics of the offense apply to the most serious and second most serious conviction offenses only. This results in the need for caution when trying to establish the proportion of offenders serving time for particular offenses. For example, an offender may have been convicted for felonious assault and domestic violence. The proportion of offenders currently entering prison for domestic violence will be underestimated when looking only at the proportion of offenders committed for domestic violence as the most serious offense.

A more accurate representation may be found by also considering offenders for whom domestic violence was the second most serious offense; however, we are not able to identify the number of offenders committed for domestic violence as a third or fourth most serious offense. While we believe that considering the most and second most serious offenses captures important offense characteristics for the majority of offenders entering prison for any given offense, estimates using this data base must be considered conservative estimates. Similar precautions should be taken when estimating the various proportions of victim characteristics and other variables associated with particular offenses.<sup>1</sup> The data base also does not contain information on the number of counts of offenses upon which the inmate was sentenced.

A second concern regards juvenile offense data. The availability of juvenile records continues to be problematic. Many county juvenile courts have a policy of refusing access to juvenile records; some will permit access only with a signed waiver from the inmate. Other juvenile courts routinely destroy juvenile records for individuals born before a specific date. As a result, the completeness of the juvenile record information remains questionable. Great care should be taken when attempting to draw conclusions from juvenile criminal history information contained in the intake databases.

The third concern deals with several limitations of adult criminal histories in general. The reader should be aware that the intake data reports only prior adult convictions, not arrests. No conclusions can be drawn regarding arrests from the data. There is also no data recorded on indictment charges nor plea bargaining for prior convictions. For example, it is possible that an inmate was at some previous time charged with a violent offense but agreed to plead guilty to a lesser, non-violent offense. As a result, there may be a number of individuals in the intake data base who are identified as having no prior convictions for violent offenses, but they actually do have a history of violent behavior.

---

<sup>1</sup> For inquiries which require a greater degree of specificity, please contact the Bureau of Research for additional analysis.

## Representativeness of the Sample

It is important to note how representative this cohort of inmates is when compared to the inmates being admitted throughout the year. Consequently, the Intake 2001 should be comparable to FY2001 Intake inmates.

	<b>INTAKE 2001 %</b>	<b>TOTAL FY 2001 %</b>
<u>Sex</u>		
Female	12.9	12.1
Male	87.1	87.9
<u>Race</u>		
African American	51.9	53.0
Caucasian	47.9	44.9
<u>Counties of commitment</u>		
Cuyahoga	25.0	24.2
Hamilton	9.4	10.6
Franklin	10.7	10.1
Summit	5.3	5.9
<u>Type of Offense</u>		
Crimes Against Persons	24.0	24.7
Sex Offenses	6.3	6.3
Burglary Offenses	7.0	7.5
Property Offenses	16.6	16.7
Drug Offenses	31.1	31.0
Motor Vehicle Offenses	0.9	0.9
Fraud Offenses	4.3	3.1
Weapons Offenses	2.4	2.7
Justice and Public Administration	7.4	7.0
Other Offenses	0.0	0.0
<u>Mean Age in Years</u>		
Female	34.0	33.2
Male	30.8	30.8

This comparison suggests strongly that the Intake 2001 is representative of all inmates admitted into ODRC's prisons in FY2001.

## Structure of the Report

This report is organized into three sections. The first section presents the demographic and social characteristics of the 2001 intake sample. The second section provides information on the characteristics of the most serious current commitment offense. Information regarding the offender's prior criminal history is presented in the third section.

In reviewing the tables, please be aware that due to rounding percentages may not total exactly to 100%. This condition may be true for any table in this report.
